

Please reject the NAB'spetition 04-160. Instead, support XM's ability to provide the kind of programming that is necessary to all listeners. XM provides variety and quality that are not available elsewhere which is why we pay for such services. Why should the NAB be allowed to dictate what we are permitted to hear. Are they afraid of losing their audiences? Is sattelite radio too much competition for them. There is not other reason for NAB causing such a problem.
